

Installation Guide

MP-1.5NPS-CP

1.5" NPS CEILING PLATE

The MP-1.5NPS-CP provides a safe ceiling mounting plate for 1-1/2"-11 NPS and NPT threaded pipes. The ceiling plate can be installed to most horizontal overhead structures, including ceiling trusses, beams, Unistrut and other structural components

Contents:

Be sure that all of the following items are included in this kit before proceeding:

- 1 pc Ceiling Plate w/ 1.5"-11 NPS Thread
- 1 pc Set Screw, 1/4-20x .25 " long
- 1 pc Instruction Sheet

Installation Procedure:

Step 1:

Install Ceiling mount to the selected horizontal mounting structure or surface. The structure or mounting surface must be able to support at least 5 times the weight of the speaker and mount (Figure 1). Mounting screws and bolts are not included.

STEP 2:

Loosen the set screw on the ceiling plate's coupler before attaching the threaded pipe. Pipe should at least go in 1/2" or more into the ceiling plate's coupler (Refer to speaker mount installation guide).

Step 3: **Attached Speaker Mount**

Refer to the selected speaker mount installation guide.

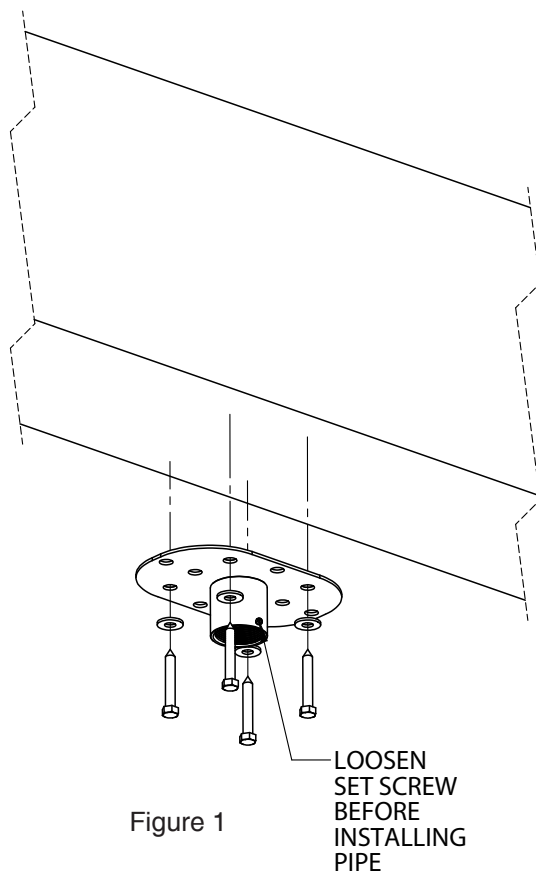

Figure 1

Note to installers:

Due to the wide variety of wall structures, materials and mounting methods, the installing contractor must exercise proper judgment in selecting the mounting area and hardware.

As a guide, the installation, when complete should be capable of supporting 5 to 10 times the actual applied load. Always use a backup safety system such as a safety cable.

To assure a trouble-free installation, read through and follow these instructions carefully before beginning. If you have doubts about the integrity of the structure you are mounting to or you are not sure about the proper hardware to use, consult a structural and/or hardware specialist.
